IN THE CLAIMS

Attached is a listing of the claims in accordance with the revised format of amending. Claims 86-88 and 135 have been currently canceled.

1.   (Previously presented) A method of WWW page retrieval from a web site, comprising:

entering information associated with a content of the site, which information is not a WWW address or a portion thereof, which entering comprises typing by a user;

providing said information to a software not associated with said site;

providing a page address of a page of said site, responsive to said entered information, by said software;

retrieving said page responsive to said page address; and

directly displaying said page , using a browser, without any additional user intervention, beyond said entering,

wherein said information is entered in a non-Latin language.

2.   (Original) A method according to claim 1, comprising providing user-dependent information and wherein providing a page address comprises analyzing said information using said user-dependent information.

3.   (Previously presented) A method according to claim 1, wherein providing a page address comprises selecting a URL from a translation table in which said information is a unique index.

4.   (Canceled)

5.   (Previously presented) A method according to claim 112, wherein said database is at least logically associated with a particular user.

6.   (Original) A method according to claim 5, wherein said database includes information regarding a particular user, which information is entered by said user, which page is selected for display responsive to said information and wherein said database is stored at a location remote from where the information is entered for display of said page.

7.   (Previously presented) A method according to claim 112, wherein said database comprises at least one association which is particular to said particular user.

8.   (Original) A method according to claim 7, wherein analyzing comprises analyzing responsive to said at least one association.

9.   (Previously presented) A method according to claim 7, wherein said at least one association is entered by said particular user.

10.   (Previously presented) A method according to claim 7, wherein said at least one association is automatically generated responsive to a selection of a WWW page, from a plurality of suggested pages, by said particular user.

11.   (Original) A method according to claim 7, wherein at least one association in said database is automatically generated responsive to a selection of a particular WWW page, from a plurality of suggested pages, by a plurality of users.

12.   (Previously presented) A method according to claim 112, wherein said database is at least logically associated with a translation server, which utilizes said database for translation.

13.   (Previously presented) A method according to claim 5, wherein said at least logical association comprises a physical association.

14.   (Previously presented) A method of WWW page retrieval from a web site, comprising:
        entering information associated with the content of the site, which information is not a WWW address or a portion thereof, which entering comprises typing by a user;
        providing said information to a software not associated with said site;
        analyzing said information using user-dependent information;
        providing a page address of a page of said site, responsive to said entered information and said analysis, by said software;
        retrieving said page responsive to said page address; and
        directly displaying said page, using a browser, without any additional user intervention, beyond said entering.

15.   (Previously presented) A method according to claim 14 wherein providing comprises providing responsive to a geographical location at which said information is entered.

16.   (Previously presented) A method of WWW page retrieval from a web site, comprising:

entering information associated with the content of the site, which information is not a WWW address or a portion thereof, which entering comprises typing by a user;

providing said information to a software not associated with said site;

analyzing said information responsive to a geographical location at which said information is entered;

providing a page address of a page of said site, responsive to said entered information and said analysis, by said software;

retrieving said page responsive to said page address; and

directly displaying said page , using a browser, without any additional user intervention, beyond said entering.

17.   (Previously presented) A method according to claim 16, wherein said information is entered by a user in a same way in which a standard URL would be entered.

18.   (Original) A method according to claim 17, wherein said information is entered into a URL entry field in said browser.

19.   (Previously presented) A method according to claim 1, wherein said information is entered into a window overlaying said browser.

20.   (Original) A method according to claim 19, wherein said window is overlaying a location window of said browser.

21.   (Previously presented) A method of WWW page retrieval from a web site, comprising:

entering information associated with the content of the site, which information is not a WWW address or a portion thereof, which entering comprises typing by a user;

providing said information to a software not associated with said site;

providing a page address of a page of said site, responsive to said entered information, by said software;

retrieving said page responsive to said page address; and

directly displaying said page, using a browser, without any additional user intervention, beyond said entering,

wherein said information is entered into a URL entry field in said browser.

Claims 22-88 (Canceled)

89.   (Previously presented) A method of WWW page retrieval from a web site, comprising:

entering one or more words into a browser program, the one or more words not comprising a WWW address or a portion thereof, which entering comprises typing by a user;

providing said one or more words to software at a first location other than the location of said browser;

providing a page address of a page stored at a second location, responsive to said entered one or more words, by said software;

retrieving said page stored at a second location responsive to said page address; and

directly displaying said page, using said browser, without any additional user intervention, beyond said entering; wherein

providing the page address of the page stored at the second location comprises performing an automated web search.

90.   (Previously presented) A method according to claim 89 wherein providing said one or more words comprises providing only one word.

91.   (Previously presented) A method according to claim 1, wherein providing the page address, comprises performing an automated web search.

92.   (Previously presented) A method according to claim 14, wherein providing the page address, comprises performing an automated web search.

93.   (Previously presented) A method according to claim 16, wherein providing the page address, comprises performing an automated web search.

94.　(Previously presented) A method according to claim 21, wherein providing the page address, comprises performing an automated web search.

95.　(Previously presented) A method according to claim 1, wherein said providing the page address comprises retrieving information about a site from a location, and comprising updating of said information by an operator of said site.

96.　(Previously presented) A method according to claim 16, wherein said information is in a non-Latin language.

97.　(Previously presented) A method according to claim 21, wherein said information is in a non-Latin language.

98.　(Previously presented) A method according to claim 85, wherein said information is in a non-Latin language.

99.　(Previously presented) A method according to claim 89, wherein said information is in a non-Latin language.

100.　(Previously presented) A method according to claim 1, wherein said information is entered into a URL entry field in said browser.

101.　(Previously presented) A method according to claim 14, wherein said information is entered into a URL entry field in said browser.

102.　(Previously presented) A method according to claim 21, wherein said information is entered into a URL entry field in said browser.

103.　(Previously presented) A method according to claim 89, wherein said information is entered into a URL entry field in said browser.

104.   (Previously presented) A method according to claim 1, wherein providing a page address comprises providing responsive to a popularity level of said page.

105.   (Previously presented) A method according to claim 1, wherein providing a page address comprises providing based upon statistical information correlating said entered information and websites.

106.   (Previously presented) A method according to claim 1, including adding a user interface functionality to said browser, which functionality is used for interaction with said site.

107.   (Previously presented) A method according to claim 106, wherein said interface comprises icons.

108.   (Previously presented) A method according to claim 106, wherein said interface comprises one or more menus.

109.   (Previously presented) A method according to claim 106, wherein said functionality comprises a purchase function.

110.   (Previously presented) A method according to claim 106, wherein said functionality operates based on information stored in a database.

111.   (Previously presented) A method according to claim 109, wherein said database contains information arranged by site.

112.   (Previously presented) A method according to claim 1, wherein said page address is determined using a database of associations.

113.   (Previously presented) A method according to claim 14, wherein said information is in a non-Latin language.

114.   (Previously presented) A method according to claim 1, wherein said information does not meet domain name specifications.

115.   (Previously presented) A method according to claim 1, wherein said information does not meet URL specifications.

116.   (Previously presented) A method according to claim 1, wherein said information comprises a plurality of words.

117.   (Previously presented) A method according to claim 1, wherein said information comprises a field identifier and a field-match value.

118.   (Previously presented) A method according to claim 1, wherein said information is associated with an owner of the site.

119.   (Previously presented) A method according to claim 118, wherein said information comprises a partial street address of said owner.

120.   (Previously presented) A method according to claim 118, wherein said information comprises a telephone number of said owner.

121.   (Previously presented) A method according to claim 1, comprising analyzing said information to determine a single translation thereof.

122.   (Previously presented) A method according to claim 121, wherein analyzing comprises correcting spelling in said information.

123.   (Previously presented) A method according to claim 122, wherein correcting spelling comprises correcting for at least one transliteration error.

124.   (Previously presented) A method according to claim 121, wherein analyzing comprises applying natural language recognition on said information.

125.   (Previously presented) A method according to claim 121, wherein analyzing comprises blocking access to certain types of sites.

8

126.   (Previously presented) A method according to claim 121, wherein said translation comprises a only domain name.

127.   (Previously presented) A method according to claim 126, wherein said translation comprises a URL.

128.   (Previously presented) A method according to claim 121, wherein said analyzing is performed locally, where said page is displayed.

129.   (Previously presented) A method according to claim 121, wherein said analyzing is performed remotely from where said page is displayed.

130.   (Previously presented) A method according to claim 121, wherein said analyzing comprises determining a one-to-one mapping between said information and a translation.

131.   (Previously presented) A method according to claim 1, wherein said information is entered in a language not supported by said browser.

132.   (Previously presented) A method according to claim 1, wherein said information is entered in a font not supported by said browser.

133.   (Previously presented) A method according to claim 1, wherein directly displaying said page, comprises automatically providing password information for accessing said page.

134.   (Previously presented) A method according to claim 133, wherein a plurality of such passwords are stored in a password database associated with said user.

135.   (Canceled)
